

TABLE OF CONTENTS

Executive Summary	1
Introduction.....	8
Objectives	9
Methodology	10

HISTORICAL CONTEXT

1 Socio-Political And Economic Background Of Modern South Korea	15
1.1 Post-World War II Partition and the Korean War	15
1.2 South Korea and its Post-War Economic Growth	15
1.3 The “International Monetary Fund Crisis” of 1997 – 1998	16
1.4 Economic Recovery	16
1.5 The Hollowing Out of the South Korean Economy to China	20

MARKET FOR HEAVY TIMBER CONSTRUCTION, WOOD BUILDING COMPONENTS AND SECONDARY WOOD PRODUCTS

2 Post-War Standardization of the South Korean Construction Industry	23
3 Structure of the South Korean Construction Industry and its Role in the Country’s Overall Economic Development.....	25
4 The South Korean Construction Industry by Building Type and Material Used	27
4.1 Concrete - Reinforced Concrete	27
4.2 Steel I-Beam	28
4.3 Masonry - Concrete Block, Cement Brick	28
4.4 Stone	28
4.5 Clay Brick and Tiles	28
4.6 Wood – Log	28
4.7 Engineered Wood and Heavy Timber	28
4.8 Light Wood Frame	28
5 The South Korean Construction Industry’s Domestic Production .	29
6 Market Demand – The 4th National Development Plan	31
7 The Structure of the South Korean Building Materials Industry	32
7.1 The Domestic Building Materials Industries	32
7.2 The South Korean Building Materials Importing and Distribution Systems	32
8 The South Korean Forest Industry	33
9 The South Korean Softwood Importing Industry and Foreign Competition for Market Share	34
9.1 Impediments to the Import of Wood Products	40

10	The South Korean Regulatory Framework	42
	10.1 Structural Wood Building Standards	42
	10.2 Fire Codes	44
	The Fire Resistance Performance Standard of Light Wood Frame Structures	
	Glossary of Fire Codes	
	Amendment of Enforcement Regulation and Notice - Ministerial Decree Following Announcement of Korea Building Code and Enforcement Decree	
	KSF 1611-1 Fire Resistance Performance for Elements of a Light Wood Frame Building	
	10.3 Material Standards and Certifications	52
	10.4 Indoor Air Quality Building Code Revisions	52
	10.5 The South Korean Building Code Revision Process	52
	10.6 KBC Revision Schedule	52
	10.7 Opportunities for Input	53
11	The Availability and Comparative Costs of Labour and the Skilled Building Trades	53
	11.1 Availability and Cost of Labour By Structural Material	53
	11.2 Existing South Korean Training Programs and Certifications for Wood Construction	55
	11.2.1 WBDC (Wood Building Design Center)	
	11.2.1.1 Training and Education	
	11.2.1.2 Details of the One Year Diploma Course	
	11.2.2 KWBD (Korea Wood Building Design Association)	
	11.2.2.1 Wood Frame Housing Inspection Pilot Programs	
	11.2.2.2 The Licensing of Wood Building Designers and Technicians	
	11.2.2.3 The Healthy Home Design Center – Testing and Certification of Building Materials	
12	FIVE CASE STUDIES OF COMPARATIVE CONSTRUCTION COSTS IN KOREA BY STRUCTURAL MATERIAL USED	57
	Reinforced Concrete	
	Light Steel Frame	
	Light Wood Frame	
	Light Wood Frame – Partially Pre-Cut/Prefabricated	
	Heavy Timber Building	
13	Current Use of Wood Products/Components in South Korea Buildings	60
	13.1 By Material	60
	13.2 By Building Type	61
	13.2.1 Low-rise Residential	
	13.2.2 Mixed-use retail/commercial	
	13.2.3 Culture and Assembly Facilities	
	13.2.4 Church and Temple Facilities	
	13.2.5 Institutional	
	13.2.6 Memorial Exhibition Facilities	

13.2.7 Commercial Facilities	
13.2.8 Outdoor & Recreation Facilities	
13.3 Building Components for Which Wood Might Be Substituted in South Korean Construction	67
14 Market For Heavy Timber Construction	68
14.1 Green Building Policies	68
14.2 Government Programs to Improve the Quality of Urban Life and to Provide New Public Facilities	69
14.3 Church-sponsored Social, Medical, Educational and Cultural Developments	69
14.4 Decentralization and the New Town Movement	69
14.5 Destination Resort Developments and the “Pension” and Second Home Markets	70
MARKET FOR LIGHT WOOD FRAME CONSTRUCTION IN SOUTH KOREA	
15 Background to the South Korean Housing Industry.....	73
15.1 The Traditions of a Korean House	73
15.2 The Post-War, Pre-IMF Crisis Housing Market in Korea	76
15.3 The Post-IMF Crisis Housing Market	84
16 The Current Housing Market in South Korea.....	86
16.1 Population and Demographic Trends in South Korea	86
16.2 The Structure and Stratification of the Residential Construction Industry in South Korea	89
16.2.1 The Korean Housing Association	
16.2.2 The Korea Housing Builders’ Association (KHBA)	
16.2.3 The Steel Home Club and the Steel Construction Club	
16.2.4 The Korea Wood Construction Association (KWCA)	
16.3 Housing Production	92
16.3.1 A Word of Warning	
16.3.2 Housing Trends by Developer, Building Type and Material Used	
16.3.3 The Potential Impacts of Government Policies on Wood Housing Production	
16.4 Housing Finance	97
16.4.1 <i>Chonsej</i>	
16.4.2 Typical Pre-IMF Crisis Mortgage Financing	
16.4.3 Typical Post-IMF Crisis Mortgage Financing	
16.4.4 Creation of a Formal Residential Mortgage System in South Korea	
16.4.5 New International Lenders Entering the Market	
17 Light Wood Frame Non-Residential Construction.....	101
17.1 Destination Resort Developments	101
17.2 “Pension” Developments	101
17.3 School Upgrades	103
17.4 Urban Renewal and Renovation Market	103

18	Trends in Consumer Preferences in Housing	103
	18.1 By Housing Type	103
	18.2 By Amenities	103
	18.3 By Facilities and Materials	104
19	The Current State of Light Wood Frame Construction in South Korea	104
	19.1 Lack of Skilled Labour	104
	19.2 Shift in Market Aspirations	105
	19.3 Shift in Wood Builders in South Korea and the Emergence of Integrated Land Development Companies	106
20	Future Prospects and Problems for Light Wood Frame Construction in South Korea	107
CONCLUSIONS, STRATEGIC ISSUES AND RECOMMENDATIONS		
21	Conclusions	115
	21.1 Demographic and Socio-Economic Market Forces	115
	21.2 Government Policies Driving the South Korean Wood Construction Industry	115
	21.3 The American Experience	116
	21.4 The South Korean Market Potential for Canadian Wood Products	116
	21.5 The Current Canadian Operating Framework in South Korea	117
22	Key Strategic Issues	118
	22.1 Building Codes and Fire Regulations	118
	22.2 Labour Shortages and Costs	118
	22.3 Quality of Construction	119
	22.4 Tariffs, Duties and NTB's	119
	22.5 Identifying and Nurturing Champions and Forming Strategic Alliances	120
23	Recommendations	121
	23.1 Short-term Actions	121
	23.1.1 The 3 rd Canada-Korea Joint Steering Committee Meeting	
	23.1.2 Canadian Representation in South Korea	
	23.1.3 Further Studies	
	23.1.4 Quality of Wood Frame Buildings	
	23.2 Mid-Term Actions	124
	23.2.1 Market Development Strategy	
	23.2.2 Training Programs	
	23.3 Long-Term Actions	124
	23.3.1 A Coordinated Canadian Approach to South Korea	
	23.3.2 Implementation of a Long-Term Market Development Plan	
	Bibliography	127
	Appendices I — V	129

LIST OF TABLES

1	Changes in the Top 10 <i>Chaebol's</i> Payrolls 1997 – 1998	5
2	South Korean Macro-Economic Indicators 1995 – 1999.....	6
3	Short-Term Economic Forecast for South Korea 1998 – 2002	7
4	Categories of Construction Companies in South Korea.....	13
5	Number of Building Permits Issued in 2003 by Building Type and Materials Used.....	16
6	Total Floor Space Built by Building Type and Material Used in 2003.....	17
7	South Korean Construction Market in 2002 – 2004	17
8	Korean Imports of Softwood Logs by Country in 2001 – 2002.....	22
9	Total South Korean Finished Softwood Lumber Imports 2001 – 2002....	23
10	Value Comparison of South Korea's Total Forest Product Imports 2001 – Q1 2003	24
11	Volume Comparison of South Korea's Total Forest Products Imports 2000 – 2003.....	24
12	Korean Imports of Forestry Products from All Countries 2002 – 2003	25
13	Import of Wood Frame Housing by Country 2000 – Q1 2003.....	27
14	Fire Resistance of Exterior Walls	32
15	Fire Resistance of Interior Walls	32
16	Fire Resistance of Floor / Ceilings	33
17	Proposed Fire Resistance Performance Standards.....	33
18	Allowable Stress Specified in KS F 3020	37
19	Wall structure	37
20	Floor/Ceiling system	37
21	Labour and Skilled Trade Costs.....	41
22	Reinforced-Concrete Building	45
23	Light Steel Frame Building.....	45
24	Light Wood Frame Building.....	46
25	A Chim Construction Co reports building cost as KW3,200,000/ <i>pyung</i> or C\$1,077 per m2.....	46
26	Single-Family House: Total Floor Area = 60 <i>pyung</i>	47
27	Domestic Construction Orders Received 1985 – 1998	63
28	Housing Supply Ratio 1980 – 1995.....	64
29	Housing Construction by Unit Type.....	65
30	Building Permit Floor Area by Construction Material 1989 – 1998.....	65
31	Housing Investment Value/GNP 1885 – 1995	66
32	The Evolution of Korean Housing 1985 – 1994	67
33	Preferred Dwelling Types in Korea	68
34	Preferred Dwelling Size in Korea	68
35	Satisfaction with Current Residence	69
36	Reasons for Residential Dissatisfaction.....	69
37	Single-family Versus Wood Frame Housing Supply in Seoul and Kyonggi Province 1994 – 1997	69
38	Settlement Patterns in South Korea 1955 – 2000.....	74
39	Settlement Patterns in South Korea 1955 – 2000.....	74
40	Age:Sex Pyramid for South Korea 2003	75
41	Household Formation, the Housing Supply Ratio and House Sizes	75
42	Shift from Public to Private Sector Development 2000 – 2003	80

43	Housing Production by Type 1990 – 2003	81
44	Housing Production by House Size 1997 – 2003	82
45	Housing Production by Material Used 1996 – 2003	82
46	MOCT's 2003 New Town Plans	84
47	A Comparison of Commercial Bank and KOMOCO Loans	87
48	Monthly Payment Schedule.....	87
49	List of <i>Pension</i> Projects Currently Being Planned in South Korea.....	89
50	Imports of Prefabricated Houses.....	93
51	Medium-sized Light Wood Frame Developers	95
